

LINE8

Model SL

Power Track + Lighting + Accessory Rail

The Model SL, SL-w, SL-rgb by Line8 combines sleek design with functional versatility. It features integrated ambient lighting for a soft, inviting glow and a modular accessory rail system that supports hooks, bars, and PEG boards for easy customization. Built with Line8's signature safety and durability, the SL series offers the perfect blend of practicality, elegance, and adaptability for both home and office use.

LINE8

Model TL

Triangle Power Track + Lighting + Accessory Rail

The Line8 Model TL, TL-w and TL-rgb features a sleek triangular profile designed for versatile use on table tops or wall corners. Its angled design (adjustable to 60° or 45°) offers ergonomic access to power, making it ideal for desktops or under-cabinet mounting. Model TL also includes ambient lighting and Line8's signature modular accessory rail system—bringing form, function, and flexibility to your workspace.

Model R

Recess Power Track

Experience the ultimate power solution with Line8's Model R Power Track, proudly made in Singapore. Compatible with all Line8 adaptors, providing you with versatile power options to suit your needs. The Model R power track requires a minimum depth of 30mm for installation. This 30mm depth includes space for cable management, allowing for the routing of two sets of electrical cables and up to four Cat6 data cables within the recessed track housing. A depth greater than 30mm poses no issue, as the aluminum winged flanges of the housing will support the power track effectively.

Custom Made to 1mm precision
(200-3000mm, Joinable end-to-end)

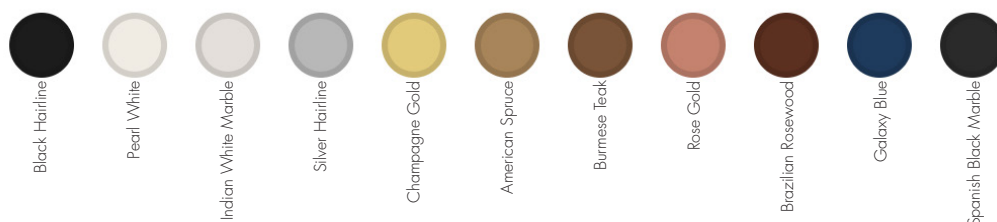

[TRACK LENGTH] + 2mm

70mm
(68mm + 2mm)

Recommended Cutout: (Track Length + 2mm) × 70mm
The track includes a 5mm external flange to mask the cutout edges.

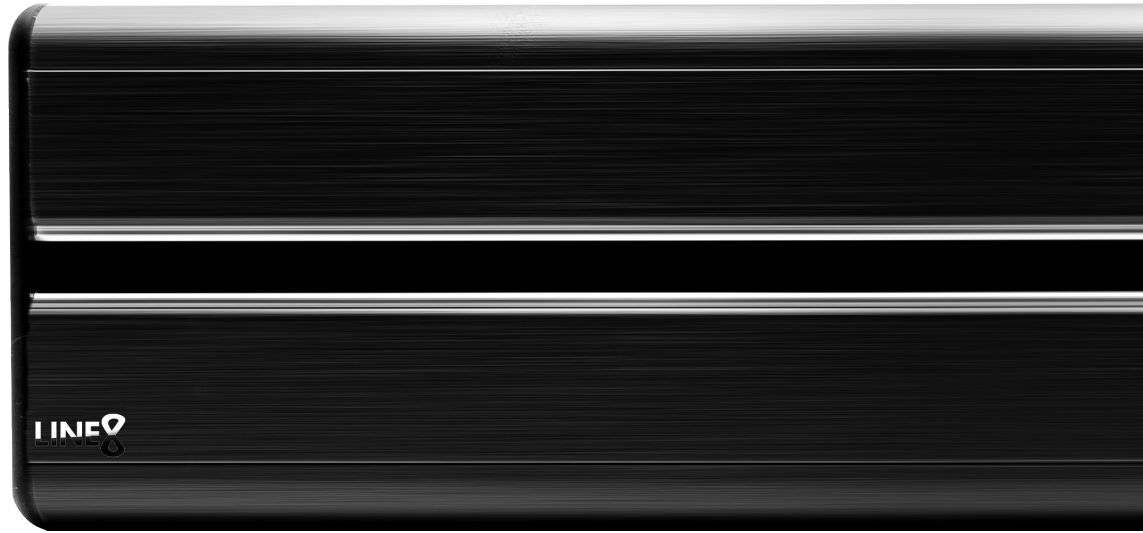

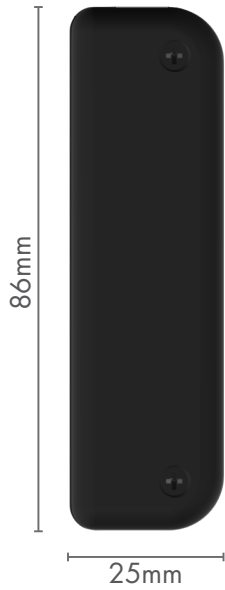

MINIMUM DEPTH : 30mm
